

Eco club is a platform which focuses on the knowledge about environment. It is an educational club that plays an important role on creating environmental awareness amongst the future generation. Established with the aim of fostering an ecofriendly mindset among students, the club has become a hub of green initiatives and a platform for individuals passionate about making a positive impact on the environment.

The Eco Club at our institution is more than just a club; it's a movement towards a sustainable and environmentally conscious future. The club promotes the idea that being environmentally conscious is primarily about making wise decisions on a personal level that alter one's viewpoint and resource consumption.
