

ABN & PRR COLLEGE OF SCIENCE- KOVVUR

ECO CLUB AND BOTANICAL GARDEN

Tree Identification and Installation of Name Boards on Campus Trees

Organized by: Eco club

Date: 19-12-2024

The "Tree Identification and Installation of Name Boards on Campus Trees" programme was successfully organized by the Eco Club in collaboration with life science. The activity served as an effective educational and environmental awareness initiative.

Trees play a vital role in maintaining ecological balance and enhancing environmental sustainability. Despite their importance, many students are unaware of the scientific names, families, and ecological significance of the trees growing around them. To bridge this knowledge gap and promote biodiversity awareness, the Eco Club organized a "Campus Tree Identification and Tree Name Board Installation Programme."

To promote environmental awareness and enhance students' knowledge of biodiversity, the Eco Club organized an activity on "Tree Identification and Installation of Name Boards on Campus Trees." The programme aimed to identify the various tree species present on the college campus and install informative name boards displaying their common names, botanical names, and families. This initiative was undertaken to create a living botanical resource and encourage appreciation of plant diversity among students and visitors.
